MediaVise Compact — NSA Approved Crusher

The First HDD Crusher To Be NSA Approved

Ideal for business or office settings, the MediaVise® Compact desktop media sanitizer deploys patented crushing plates to deliver an incredible 40,000 pounds of force to macerate the protected platters in HDDs, rendering any data stored on these media unreadable and unrecoverable. The process is fully automated and only takes 30 seconds. The Center for Storage Device Sanitization Research (CSDSR) at the National Security Agency/Central Security Service (NSA/CSS) has approved the MediaVise® Compact Digital Media Sanitizer for hard drive destruction with a rating of 90 one-inch hard drives per hour. Also destroys cell phones and PDAs.

40,000 pound force (20 tons) hydraulic crusher is unmatched in any desktop machine.

Features:

- 40,000 pound force (20 tons) hydraulic crusher is unmatched in any desktop machine.
- Patented corrugated interlocking crushing plates crush and mangle data storage platters, circuit boards and read/write heads.
- In less than 30 seconds, digital media are destroyed and safely ejected into a debris collection drawer or into a garbage bin via an optional debris chute accessory.
- Data cannot be recovered.
- Plugs into standard power outlet
- Small enough to deploy in workplace so your HDD never has to leave your secure office or server room.
- Fully automatic, simple, one-button, hands-free operation.
- Also destroys cell phones and PDAs.

Patented crushing plates apply 20 tons of pressure

HDD is warped, mangled and unreadable

Product Specifications

Media Accepted	2.5 & 3.5" HDDs | circuit boards, cell phones, PDA's
Maximum Media Size	5.75" x 4" x 1.25" (HxDxW)
Dimensions	16" x 22.5" x 9.75 (HxWxD)
Weight	132 lbs (excluded packing)
Power	120 Volts, 13A, / 240VAC, Factory Configured
Max Current	15Amps @ 120 Volts
Chamber Capacity	1 Full Size HDD 2 Laptop HDDs
Crush Cycle Time	30 Seconds
