

MediaVise® Compact V-Spike SSD Destroyer

Twice the destructive capability:

- **MediaVise®** patented 20 ton crushing force
- **V-Spike** technology delivers a pulsed high voltage jolt to memory chips

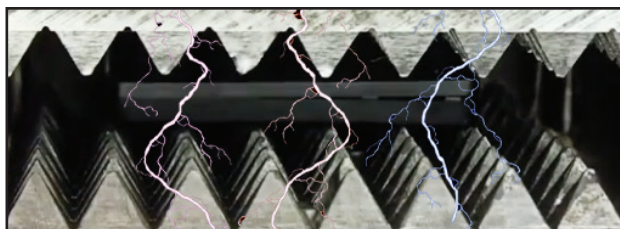

Combines Mechanical and Electrical Forces to Absolutely Destroy Solid State Drives

The MVC-SSD-V is the most radical solid-state drive (SSD) sanitizer ever developed. This dual action machine destroys computer SSDs and other solid-state media including cell phones, PDAs, circuit boards and memory cards. The MVC-SSD-V doesn't simply fold a drive, or punch a few holes in it: specially engineered plates with interlocking pyramidal spears chew, crush and demolish every square inch of media. Then it delivers crippling pulsed electrical jolts into each sector, disabling sensitive electronic components in the media, and rendering all data storage components inaccessible and unreadable.

Compact model deploys corrugated steel plates to warp and pierce from both sides as a pulsed electric jolt wipes out memory chips.

Features:

- Compact footprint is ideal for desktop applications 22.5" x 9.75".
- Physical Destruction: Internal memory chips are punctured and destroyed beyond repair, rendering the SSD completely unreadable
- Electrical Zap: Delivers a fatal electrical jolt to disable electronic components on SSD media including memory chips and control sectors
- Safety: Completely automatic, hands-free, hassle-free operation. Lock-out doors prevent machine from engaging unless doors are secured.
- User initiated unjam cycle, as well as manual unjam
- Durability: Minimum 50,000 cycles to failure. Plates never need replacing. No blades to be replaced or sharpened
- Debris collection chute optional

The SSD is first crushed and mangled by hydraulically driven interlocking plates, jolted with an electric charge that destroys data in memory chips and control sectors.

Product Specifications

Media Accepted	SSDs, cell phones, circuit boards, PDAs, memory cards
Chamber Size	1 full size SSD or 2 laptop SSDs
Max Media	5.75" x 4" x 1.25" (H x D x W)
Dimensions	16" x 22.5" x 9.75" (H x W x D)
Weight	135 lbs
Power (USA)	120 VAC 13A / 240VAC 7A, 60 Hz.
Max Current	15Amps @ 120 Volts
Full Cycle Time	30 Seconds
