

## Deploys more than twice the destructive force of any other crusher!

The MediaVise® is a high security desktop data destruction solution standing only 25" tall and 12" wide. When a computer hard drive is fed into the MediaVise®, its patented corrugated crushing plates deliver over 40,000 pounds of force to the vulnerable platters and read heads of the drive. In less than a minute, the hard drive is crushed, mangled and rendered unreadable and discharged into a debris collection bin. No other HDD destroyer offers this combination of interlocking hardened steel plates and massive crushing force.

**The MediaVise was specifically engineered to meet NSA specifications for HDD and provides the highest level of security.**

### The MediaVise Difference:

- **Complete warping of hard drive using patented, corrugated, interlocking, hardened steel plated design.** Machines that only "fold" hard drives actually leave a lot of the surface area on a platter intact. The MediaVise's patented crushing plates specifically target the entirety of the platters, leaving them completely warped and unrecoverable.
- **Maximum crushing force.** Many of the machines that "fold" or "punch" a hard drive deliver a relatively low amount of crushing force. The lower the crushing force, the more likely that the hard drive may not be completely warped. The MediaVise delivers 40,000 lbs. of force, leaving the drive completely mangled and destroyed.
- **Hassle free automated system.** This is the only system that does not require adapters or careful positioning of hard drives. Simply insert the media and press start. And the collection drawer means there is never a need to manually remove a drive.

### Product Specifications

|                     |  |
|---------------------|--|
| Media Accepted      | 2.5 & 3.5" HDDs<br>  cell phones<br>  DLT and LTOtapes |
| Maximum Media Size  | 5.75" x 4" x 1.25" (HxDxW)                             |
| Dimensions          | 25" x 19" x 12" (HxDxW)                                |
| Shipping Dimensions | 30" x 22" x 22" (HxDxW)                                |
| Weight              | 185 lbs (excluded packing)                             |
| Power               | 120/220 & 240 Volts,<br>+/- 10%, 60/50 Hz              |
| Max Current         | 13Amps @ 120 Volts                                     |
| Crush Cycle Time    | 30 Seconds   |
